About the family:

Tejna belongs to an educated and cultured Kayastha family. Though the family has modern outlook they have high regards for the traditions and value them as much. The family originally hails from Bhopal in MP, however has been settled in Baroda since three generations. Her father after finishing his engineering studies decided to follow the family tradition of continuing to be self employed instead of taking up a job. Though he decided to be a little different than his father and grandfather and shifted from their successful family business of hotels to manufacturing electrical control panels. This probably was natural to him, not only because he was electrical engineer but also had strong technical background from his maternal side. His Nanaji was Chief Engineer in WR and India Today as the Wright Brothers of India appropriately described two Mamas. One was MD of Air India and the second was Technical Director of Indian Airlines.

Tejna's mother is Post Graduate teacher in Chemistry in Kendriya Vidyalaya and is currently based in Hazira near Surat. She has been instrumental in moulding her two children, Tejna and her younger brother Shishir. Tejna's father met with a road accident in 1989 and departed leaving the total responsibility of the two children on her. She not only ensured that

the two children get the best education but ensured that their father's dream of their becoming engineers is fulfilled.

After graduating in Electrical engineering she has joined Rashtriya Chemicals and Fertilizers in Mumbai as a trainee and is currently working as Design Engineer with L&T in Baroda. Shishir after completing his mechanical engineering from Ahmedabad is currently working with Maruti Udyog in Ahmedabad.
